

Drug Awareness 1

GENERAL COURSE INFORMATION:

This course is for individuals who work in a paid or voluntary capacity with people who are affected by drugs misuse and who have an interest in developing their knowledge in this area. It is also suitable for people who have completed a similar course and would like to update their skills.

Main Objectives:

To improve knowledge about the effects of regularly misused substances, e.g heroin, cannabis etc

To improve skills in identifying the signs of people misusing substances.

To improve knowledge about infectious diseases, e.g hepatitis.

To begin to develop an understanding of different responses to drug misuse.

To gain an overview of services available to individuals and families who are affected by drugs misuse.

This course is practical and informative.

Participants are expected to contribute to discussions and learn from others within the group. This course will be delivered taking into account the expectations of the groups and may include lectures, group discussions, video, role play, etc.
